PROFILE

Computer Science and Technology Engineer (ITESM) with hands-on experience in full-stack web application development using React, TypeScript, Next.js, and Node.js. I have participated in the design, development, and integration of digital solutions based on REST APIs, collaborating with multidisciplinary teams using Agile/Scrum methodologies. I complement my technical profile with experience in UX/UI and applied artificial intelligence, enabling me to contribute to both the user experience and the development of scalable digital products.

EDUCATION

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM), State of Mexico Campus

Graduated in 2026

B. S. Computer Science and Technology

EXPERIENCE

Mexiware (startup, team of 14) – UX/UI & Digital Solutions Designer

2025 - Present

- Define visual strategy, conduct UX research, design prototypes in Figma, and create digital identity proposals for the studio's client projects.
- CDE Project (Consultores en Desarrollo Empresarial), Jan-Mar 2026: Designed and justified color palettes proposals and UX guidelines for their corporate website, evaluating their impact on trust, readability, el cliente

Calendar 365+1, Sustainability Platform- Full-Stack Developer

2025 - 2026

- Designed and developed a full-stack sustainability web application using React, TypeScript, Next.js, and REST APIs: featured an interactive calendar with daily challenges, streaks, and badges organized by environmental themes (water, land, air, responsible consumption), plus a personal tracking log.
- Built the proposal submission module (for projects and strategic initiatives) featuring authentication, role-based access control, secure session management, and file validation
- Managed credentials via environment variables to protect sensitive information within the source code

Bowling Alley Management Application- Full-Stack Developer

2026

- Collaborated on building a Next.js-based system to manage games, players, teams, and business operations
- Developed features using TypeScript and participated in frontend-to-backend integration via REST APIs
- Collaborated on bug fixing, feature debugging, and maintaining existing code to improve stability and maintainability

ACADEMIC AND INVESTIGATION PROJECTS

Mental Health Risk Detection System- NLP and LLMs

2026

- Collaborated on developing a social media post classification system to identify signs of eating disorders (EDs), training NLP and Transformer models (BERT, RoBERTa) using zero-shot and few-shot approaches.

Trendify - Applied Challenge with NDS Cognitive Labs

2025

- Led frontend development and UX/UI design using React, integrating REST services and coordinating feature implementation within an Agile environment.
- Collaborated on developing Flask endpoints, testing with Postman, database design, and access control.

Agro Analytics - Territorial Analysis Platform

2025

- Collaborated on a geospatial model for agricultural analysis using Python and PostGIS, deployed via Docker with a React-based visualization interface.
- Co-designed the PostgreSQL/PostGIS database structure (primary/foreign keys, referential integrity) and set up isolated environments using Docker, managing credentials via environment variables.

Zazil Application- Todas Brillamos Foundation (team of 5)

2024

- Collaborated on the design and development of an Android mobile app for e-commerce using Kotlin, as well a web-based administrative dashboard for inventory and sales management.
- Integrated backend services and API consumption to support mobile app functionalities.

SKILLS

Languages and frameworks: Python, JavaScript, TypeScript, SQL, C#, React, Kotlin, SQL, Next.js, Flask, Node.js, Unity

Web Development: REST APIs, Frontend Development, Backend Development, Responsive Design

UX/UI Design: Figma, user research, branding, prototyping

Databases: MySQL, MongoDB, PostgreSQL

Machine Learning / NLP: Machine Learning, NLP, Transformers, LLMs

Security: Authentication, access control (RBAC), secure credential management, web application security, data integrity, Docker isolation

Network: TCP/IP, Networking, Network Security

Project Management and Dev Tools: Jira, Agile/Scrum, Excel, Docker, Git

LANGUAGES

Spanish: native - English: advanced - German: basic (self-taught, without formal certification)

CERTIFICATIONS AND RECOGNITIONS

Cisco CCNA: Enterprise Networking, Security and Automation 2026 Anthropic: AI Fluency: Framework & Foundations 2026

Cisco: Introduction to the Internet of Things 2025 Cisco: Introduction to Cybersecurity 2025 Google Cloud: Prompt Design in Vertex AI 2025

Tec Startups Founder: Tecnológico de Monterrey, for completing the validation stage of the Science and Technology-Based Incubation Program 2026
